

Dear coordinators,

It is true that due to financial application reasons we had to limit the number to three workshops with the following topics:

- Are non-formal education initiatives always beneficial?
- Self-perception in the teaching process
- Solo entertainer or moderator? The science teacher of the future

BUT: It is very important for us that every teacher who is interested in the European exchange about teaching concepts has the opportunities to do that. (see my mail 7/11/08)

The topics above are quite broadly defined. That is why we think that all teachers interested in working together could join one of the workshops named above. The interdisciplinary topics maybe also fit in the themes above.

AND: We added your workshop in the forum, too. So you can continue your exchange from the workshop there. Join in: [www.science-on-stage.de/forum](http://www.science-on-stage.de/forum)

You can subscribe there as follows:

1. go to [www.science-on-stage.de/forum](http://www.science-on-stage.de/forum)
2. Click "Registrieren" in the right corner above.
3. Accept the condition (Click on "Ich bin mit diesen Bedingungen einverstanden")
4. Fill out the required fields. English speaking people, please mark under "Sprache" "English" then you will get English subscription details.

For any questions or problems you can contact Johanna Schulze under [j.schulze@science-on-stage.de](mailto:j.schulze@science-on-stage.de)

Best wishes and a nice weekend!  
Johanna Schulze
